TITLE: GEL CANDLE COMPOSITION AND HOLOGRAPHIC ASSEMBLY

BACKGROUND OF THE INVENTION

1. Field of the Invention:

This invention pertains to candles, and more specifically, to candles formed of transparent gels.

2. Description of the Related Art:

Candles have been used for thousands of years as a source of light or heat, or for ceremonial purposes. Candles have been adapted to produce scent and /or decoration and are now particularly popular. While traditional wax candles can be modified to many different shapes, colors, and fragrances, they are unavoidably opaque and thus are limited in ornamental capacity. Liquid oil candles permit the addition of dispersed decorative particles throughout the candle, yet cannot be formed into freestanding shapes, i.e. pillars.

Recently, gel candles made of highly refined, high viscosity hydrocarbon oils
